

Spectrafuge™ Mini Centrifuges and Slide Spinner

Compact in design and personal sized, the *Spectrafuge Mini* is ideal for microfiltration and quick spin downs from the walls and caps of microcentrifuge tubes while the *Slide Spinner* is designed for drying microarray slides before scanning.

The *Spectrafuge Mini* is supplied with rotors and adapters to accommodate 1.5/2.0 mL, 0.5 mL and 0.4 mL tubes as well as 0.2 mL strips and individual tubes. The rotors are easily interchanged.

The *Slide Spinner* dries two slides in as little as 10 seconds for quality imaging and screening results. The slides are placed into cassettes that catch all liquid without splashing. Cassettes are reuseable.

Both centrifuges feature a translucent lid that pivots on a durable stainless steel hinge pin. A switch on the side of the centrifuge starts and stops operation. Alternatively, with the switch in the "on" position, the centrifuge can be started and stopped by closing and opening the lid.

The *Spectrafuge Mini* is available in five different lid colors: gray, blue, teal, purple and red.

- For microtubes and strip tubes or slides
- Convenient on/off switch
- Small footprint
- Starts and stops in seconds
