

KZ-25 Pump Head

KZ25 pump head is suitable for the big flow transmission, up to 6800mL/min, can load various tubing. Replacing tubing only wastes several seconds, easy to operate. can be mounted in tandem(up to 2).The rollers adopt 304 stainless steel, the shell adopts transparent PC material, moderate intensity, it is convenient for observing the internal work situation of pump head. The top press block adopts PPS material which is resistant to high temperature and corrosion.

Specifications:

- Flow range: $\leq 6800\text{mL}/\text{min}$
- Speed range: $\leq 600\text{ rpm}$
- Shell material: PC
- Press block material: PPS
- Roller material: 304 stainless steel
- Roller number: 3
- Tubing-fixing adjustment: manual
- Gap adjustment: fixed
- Applicable tubes: 15 #, 24 #, 35#, 36#
